

# Plastic Linking Stools

These multi-purpose plastic stools link like a puzzle to promote cooperation and learning for kids 4 – 10. Ideal for home or school, each stool can double as a lap desk and connect in 3 ways. Depending on which leg is inserted into which opening, children, parents and teachers can make rows, zigzags, snakes and circles. The stools stack up for storage and their 12-inch height is comfortable for both sitting and working.

Engineered for maximum strength and safety with smooth and rounded edges each stool holds up to 200 lbs. with a wide leg stance for stability. Available in bright primary colors: blue, red, yellow or green. Each stool is covered by our unconditional 5-year guarantee and there's an instructional sheet engraved underneath each plastic stool!

Product Number: KP1000
