Assembly: Fully assembled

The Utility Cart is a versatile all-purpose storage and transportation unit. Designed for extra heavy loads of books, art supplies, audio/visual equipment, computers and more. The Utility Cart is made from high quality birch veneer plywood that is cross-banded with 14-ply construction for extra strength and durability. The entire unit is built using ¾-inch thick components with attractive rounded edges and finished with several coats of clear catalyzed lacquer for added surface protection.

There are three shelves that are interlocked by routed dados into each side panel and secured by threaded metal inserts and machine bolts. The Utility Cart can support loads of up to 300 lbs per shelf. Four heavy-duty (two locking) casters allow ease of mobility and they are securely fastened by steel brackets which are bolted through the leg panels. Each shelf has a 1½-inch deep protective side rail and measures 18 inches wide x 28½ inches long.
