Delivery: Please allow 3 to 4 weeks for delivery.

Dimensions: 38 inches long x 29 inches deep x 34 inches high. Table height adjusts from 16 inches to 30 inches.

Colors: Natural

These beautiful bentwood, adjustable computer tables are constructed entirely from select white birch hardwood veneers. The carrel-like table creates an inviting and protective environment with room for 2 kids, a wheelchair, or a teacher and child. The desktop will accommodate a CPU, monitor, keyboard, mouse and printer, plus room for writing. The table creates a work area that is conducive to learning, hides the mess of wires, and stops equipment from falling.

Computer driven routers accurately cut and shape all edges and openings, which are then hand sanded for smooth, round and safe surfaces. Rear cutaways reduce heat build-up behind the computer. Both the desktop and storage shelf feature a 2 ½ inch crescent moon cutout at the rear for full wire management.

The generous sized desktop (36 inches wide x 28 inches deep) is height adjustable in 2-inch increments from 16 inches to 30 inches. The unit rolls easily on four 840 lb rated, non-marking, 3-inch locking casters that are securely bolted through the frame. A special water-based, non-toxic finish that is extremely durable and environmentally friendly is applied in a multi-coat process. All screws and bolts are coated or plated for rust resistance.

Optional legs are available to create a “standing kiosk or study carrel”. The solid round maple legs are 1 5/8 inches in diameter and 25 inches in length. With legs the desktop height adjust from 28 inches to 40 inches and comes with an extra shelf. Specify by product code.
