

The Summa series has solutions for many of the needs for computer rooms. Summa GJ table on castors, Minus chair and Summa cabinets.

Summa group work tables and cabinets

DESIGN TAPIO ANTILA

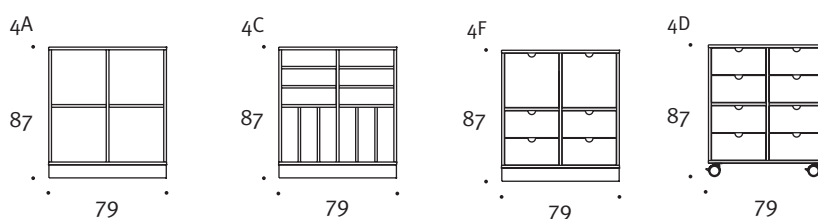

We have worked closely with teaching professionals in designing our Summa group work furniture.

The versatile range of tables and cabinets in the Summa group work series can meet the changing needs of the learning environment, from early learning through to adult education. Summa tables can also be used as general purpose tables, as teacher's desks and as computer tables. Summa storage cabinets, with their modular dimensions, give flexibility for building individual storage solutions.

Summa storage units meet all the storage requirements of the learning environment, everything from basic bookshelves to mobile storage units for each student. Summa cabinets consist of a basic component with 4 or 6 compartments, which can be fitted as required with modular-dimensioned shelves, space dividers, drawers or doors. The frames of the cabinets are made of birch or beech melamine. The shelves, space dividers, doors and drawer fronts are made of MDF board, with birch or beech coloured or light grey melamine coating. The sides of the Summa drawers are metal and fitted with sliding rollers. The standard units have one shelf inside the door.

Summa storage units are 426 mm deep and 870 or 1260 mm high. The units can be fitted with the same castors as the Summa tables. Cabinets without castors can be stacked two high. The series also includes the cabinet 6S, for teachers, which has a door with a lock and a slot for mail. The price list for Learning Environments contains all standard Summa storage combinations.
